## **WE'RE THE ANTIDOTE TO THE MEGA-CARRIERS!**

In a transportation universe increasingly populated with inflexible, impersonal mega-carriers, EA Logistics stands proudly as an oasis of service, communication and flexibility. Successful freight movement often comes down to the details and how your forwarder manages them. This is a key difference between EA Logistics and our competition.

Since our start in 1977, we've evolved to become a collection of specialists in multiple areas of freight including US & Canadian LTL, Domestic Air, International Air & Ocean, Hotshots, Distribution Services and Tradeshow. Within each of these specialty groups we have the dedicated and resourceful people to accommodate just about any transportation need you may have. Additionally, with warehouse facilities available throughout the USA & world we can custom-tailor a logistics program that may include parts banks, warehousing or any other logistic solution matched to your requirements.

Our incredible people are specialists in their respective fields and strive to understand your unique needs. We create solutions that work in the real world. Whether it's automatic POD's to your email, 2000 LTL deliveries within a one-week window or a complex multi-modal merge-in-transit for a tradeshow shipment - we're here to listen, understand and act. We personalize our service for you.

Throughout our growth, we've taken great care to improve upon our reputation for dependability and communication.

Our entrepreneurial spirit runs throughout our organization and is the antidote to the one-size-fits all mentality. There's no substitute for that "can-do" attitude. Just tell us what you need and we'll get it done right.

So whatever your transportation need, give us a call. You and your customers will be glad you did.
